

# Two person group:

- **The Engineer** - describes the pieces needed and gives instructions for how to assemble them.

- **The Builder** - follows the directions and puts the pieces together

- **Roles are switched**

# Three person group:

- **The Engineer** - describes the instructions

- **The Supplier** - Finds the correct pieces

- **The Builder** - follows the directions and puts the pieces together

- **Roles are switched**

**Engineer**

**Supplier**

**Builder**

# Three person group:

- **The Engineer** - describes the instructions

The Engineer designs the model and describes the bricks required to the Supplier

- **The Supplier** – Finds the correct pieces

The Supplier finds the bricks and supplies them to the Builder

- **The Builder** - follows the directions and puts the pieces together

The Builder builds the model with the bricks supplied according to the Engineers instructions

- **Roles are switched**
